FOR IMMEDIATE RELEASE

Projector Lamp Services still offers free recycling.

Bohemia, NY – January 20, 2009

Recently, there has been news covering the increase of recycling fees. Unfortunately, the increases have been associated with the weakened economy and the decreased value of plastics and metals. With so many people making a conscious effort to change their lifestyle in order to protect the environment, it is untimely that in a destabilized economy people will be required to factor recycling into their budget. Projector Lamp Services, LLC (PLS), stands by a credo that not only promotes but also provides Green AV. *RelampIt, Recycle, Renew* while saving money or even for no money at all!

While the cost involved in recycling some consumer electronics, metals and plastics have increased, PLS still offers free projector lamp recycling services for anyone who would like to *go green* or simply contribute to the cause. For several PLS customers, relamping & recycling is the beginning of a relationship with “*going green.*” Even if relamping & recycling is the first and one-thing customers do to contribute to helping the environment, it is a step closer towards changing their lives so as to do less harm to the environment. Around the world people are urged to recycle and contribute as much as they can to the conservation and improvement of our natural environment. Visit www.relampit.com and select the Recycle tab for further information on recycling your spent projector lamps.

Projector Lamp Services, LLC, provides re-lamping services for the projection display industry. PLS has developed a process that allows front and rear projector light sources to be remanufactured at a reduced cost without compromising lifetime or performance. PLS also offers a no charge projector lamp recycling service which focuses on reducing waste and environmental mercury contamination from the lamps found in front and rear projectors. We are dedicated to encouraging AV users to “think green” (be both economical and environmentally responsible) when it comes to projector lamp replacement.

For more information about PLS services call Gina Sansivero, Sales & Marketing Manager at +1 (631) 244-0051 or visit our website www.relampit.com
